

IIM aspirants can now revise the CAT forms

In response to requests from CAT applicants who have inadvertently made wrong selections or other errors in their registration submissions, Prometric and IIMs are currently making enhancements to the CAT registration and scheduling website.

From the evening of **18 September 2009**, candidates can log on to <https://iim.prometric.com/> to

- reschedule their CAT date
- update their Candidate Profile including
- personal details (e.g. address)
- application data (e.g. educational information)
- interview location.
- request for their Admit Card to be re-sent

Candidates who have made an error will be able to access this facility until **8 October 2009** to make any amendments to their Candidate Profile. Rescheduling, however, will still end on **1 October 2009**. For security reasons, editing of candidate's full name and user ID will not be allowed.
